

FAQ

- [What material is used for the products?](#)
- [Have you dyno tested the Carb spacers with "Dimple Technology"?](#)

What material is used for the products?

The products are made using advanced polymers specifically designed for the additive manufacturing process.

Have you dyno tested the Carb spacers with "Dimple Technology"?

Yes we have dyno tested the Dimple Technology and also independent testing has been done. Watch the the following YouTube videos for dyno tests.
